Foldable LED Screen

Smart + Automatic System Hanging LED Screen

Smart series & automatic system is a creative solution integrating indoor foldable LED display and automatic lifting and lowering system.

Thin and light, the 360° foldable LED display features remote lifting and lowering, easy storage and hanging installation.

With the electric lifting and lowering device, creative screens can be easily realized for a more desirable viewing experience.

Power supply and screen body separate design

External power supply, no need fan or air conditioner to dissipate heat
 Low temperature operation, long service life
 Low failure and high reliability.

Special soldering and plug-in dual connectors design

Plug-in PIN connector(Backup)
 2 Soldering PIN connector(Standard)
 Soldering PIN connector is for stable performance, backup plug-in PIN connector is for quick replacement of faulty module.

Double fixing of magnet and screw

The screen body can be fixed on the mounting frame through the built-in magnets. The screen body can also be fixed on the mounting bracket through the unit board with stainless steel screws

Screen Load Bearing

Each 0.25m wide unit board has 2 built in steel wires
 Maximum bearing capacity 750KG = 50m maximum
 250m height .The head and tail of the steel wire are fixed on the head and tail of bearing beam with bolts.
 The bearing beam is fixed to the mounting bracket with bolts.

Standardized installation structure

The screen is light, only 12 kg/m, and thin thickness is only 14 mm .minimize installation structure and minimize impact on buildings. Easy and quick to install. training is simple. Outdoor displays can be installed in batches

Front and Back Maintenance

Support front or back maintenance depending on how it is installed. Support to replace unit board .

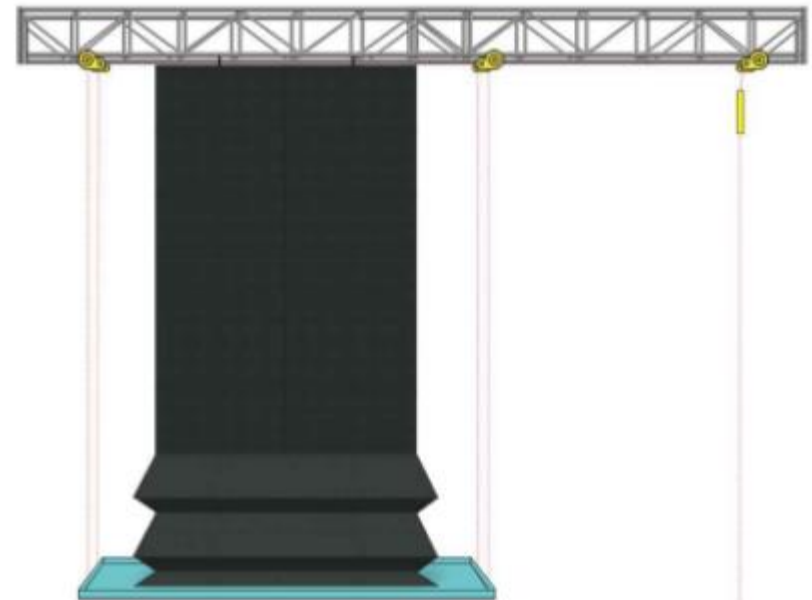

High reliability

No connectors and low heating are to ensure the screen is stable. Reliable work basically no maintenance in 2-3 years. Extended warranty for up to five years(except led lamp)

Installation Methods

Hanging installation (optional motor +pallet for automatic folding and retracting)

Pallet

Motor

Installation Methods

Magnet installation (reserved screw fixing holes)

Features

- Module size: 250mm * 250mm.
- 360° foldable.
- Indoor IP43 rating and outdoor IP65 rating
- Automatic folding and unfolding through the motor and tray.
- Improved space efficiency and quick installation.
- Prior service with less maintenance access.
- Thin and foldable, enabling safety excellence and minimal impact in case of dropping.

Application Environment	Indoor

Foldable Transparent LED Screen

Smart T Plus Transparent Hanging LED Screen

Waterproof LED displays for outdoor use
Smart T Plus series mesh foldable hanging LED displays for outdoor use.
Mesh design with great simplicity and transparency, blocking no view from interior.
Weatherproof LED screen for bright and clear display in wind and rain.

Highlights

- Module size: 250mm * 375mm
- 360° foldable
- High brightness and IP65 rating with waterproof grout for outdoor use
- Slim and light, mesh design, weatherproof
- Detachable design for easy installation
- Optional motor for one-touch lifting, lowering and folding.

- 1 Power supply and screen body separate design
- 2 Low temperature operation
- 3 Dual soldering and plug-in connectors design
- 4 High bearing capacity
- 5 Standardized installation structure
- 6 Front and back maintenance
- 7 High protection level
- 8 High reliability

► Power supply and screen body separate design

External power supply, no need fan or air conditioner

◀ Low temperature operation

Low temperature operation, long service life;
Low failure and high reliability.

◀ Front and back maintenance

Front and back maintenance
Front or back maintenance accessible,
depending on how it is installed.

► Special soldering and plug-in dual connectors design

Soldering PIN connector is for stable performance,
backup plug-in PIN connector is for quick replacement

- ① Plug-in PIN connector(Backup)
- ② Soldering PIN connector(Standard)

◀ High bearing capacity

Each led module has 2pcs 3-5mm φ steel wires,maximum bearing capacity 700kg,maximum 250 height

► High protection level

Glue filling on double-sided unit board to be completely waterproof, IP65.
100% immersion aging test before shipment .

◀ High reliability

No connectors and low heating are to ensure the screen is stable.
Reliable work, basically no maintenance in 2-3 years, extended warranty for up to five years(except led lamp)

Module 7.8

Module 15.6

Module 37.5

Dynamic folding

The maximum folding times of the screen exceeds 120,000 times, the lamps and cables are still intact.

The product has been sold for 8 years, the actual dynamic folding application cases exceed 100.

- | Transparency 56%
- | Built-in multiple sturdy steel wires, safe hanging 20-40 meters is no problem.
- | The module has built-in DCDC, which converts the high-voltage to low-voltage to supply power to the ICs and lamps, the heat generation is extremely low. The maximum load can be as long as 25-30 meters at 6000nits.
- | Signal transmission bandwidth up to 120 Mbps, large bandwidth, can load 50-70 meters.
